To minimize paper waste, we are not providing a full print schedule. For more schedule details please visit: <http://summit.godan.info/schedule/> or download the SCHED application and search "GODAN Summit 2016."

Nearly 800 million people struggle with debilitating hunger and malnutrition in every corner of the globe.

That's one in every nine people, with the majority being women and children. We are convinced that the solution to Zero Hunger lies within existing, but often unavailable, agriculture and nutrition data. Over 700 attendees are registered for the GODAN Summit including world leaders, researchers, farmers, students and others – public, private and non-profit, united around a collaboration on agriculture and nutrition data openness. The GODAN Summit 2016 is the largest event ever planned for open data in agriculture and nutrition. The goals of the GODAN Summit 2016 are to illustrate the opening, the use, and the importance of agriculture and nutrition data.

We are excited to highlight over 40 exhibitors, please take the time to visit their booths and learn how they are using agriculture and nutrition open data. We are also delighted to welcome 80 hackers for the GODAN Hackathon, please stop by the Hackathon in the Morgan Room on the 2nd Floor to encourage the efforts of these innovators!

✓ TAKE ACTION!

Sign the petition to call on governments, the private sector, and civil society to provide open data on agriculture and nutrition to end world hunger! Join the Open Data Revolution to end global hunger.

 Schmid, Alex ~ ONE Lead
 Silva, Edward ~ Food for Thought
 Sitemba, Casper ~ Kenya Government Lead
 Szpotowicz, Diana ~ GODAN Secretariat
 Thorgramson, Kelly ~ Global Partnerships Forum
 Van Waes, Kate ~ ONE

The Global Open Data for Agriculture and Nutrition (GODAN) initiative supports the proactive sharing of open data to make information about agriculture and nutrition available, accessible and usable to deal with the urgent challenge of ensuring world food security. GODAN is a rapidly growing group with over 350 international partners from governments, universities, businesses, and not-for-profits that have committed to a joint Statement of Purpose.
